

Collaboration

Our years of clinical expertise allow us to collaborate with care partners to provide quality care to our patients. *Including but not limited to:*

- Prompt New Admission Assessment
- Routine Visit Cadence per Medical Necessity
- Telehealth Services
- Collaboration with Specialty Providers
- Hospice & Palliative Care
- Home Health & Outpatient Therapy
- Psychiatric & Mental Health
- Geriatric Case Management
- Prompt Fax/Call Response
- 24 Hour Call Services
- Fall Risk Management
- Polypharmacy Reduction
- Family Communication
- Facility Education & Support
- Quarterly Metric Reports

Insurance

PacWest assumes the role of the Primary Care Provider (PCP) and bills through insurance just as a community dwelling PCP would.

PacWest Healthcare has established contracts with all insurance companies in order to deliver high quality care where it is needed most.

About PacWest

PacWest Healthcare is a community-based medical organization dedicated to delivering specialized healthcare services to senior citizens with complex healthcare needs residing in senior living communities. Our team is led by board certified family practice and internal medicine physicians. Additionally, patient care is directly overseen by nurse practitioners with doctoral preparation and board certification, with a specific emphasis on geriatrics and long-term care. PacWest Healthcare is deeply committed to meeting the unique and intricate healthcare needs of this patient demographic.

PacWest Promises

Accessibility

For patients who might have difficulty traveling to a healthcare facility due to physical limitations, transportation issues, or other constraints, the PacWest team provides a convenient way to receive in-person quality care in your community setting.

Timeliness

In situations where immediate care is required, but an in-person visit is not feasible, we offer Telehealth to bridge the gap and allow clinicians to assess the patient's condition promptly.

Flexibility

Our visits offer flexibility in scheduling, benefiting both clinicians and patients. It enables appointments to be conducted more conveniently, reducing wait times and making it easier to fit appointments into busy schedules.

Continuity of Care

It is important for us to stay apprised of all healthcare related concerns. Transitions of care are often one of the most vulnerable times in an older adults life. We offer acute visits, post-ER/post-hospital visits, follow-up appointments and routine check-ins.

Remote Monitoring

In some cases, patients may need ongoing monitoring of specific health metrics. By working with our community partners we can facilitate remote monitoring and tracking of vital signs or other health data to ensure optimal health delivery.
